Microsoft Teams

Walkie Talkie

Seamless push-to-talk communication

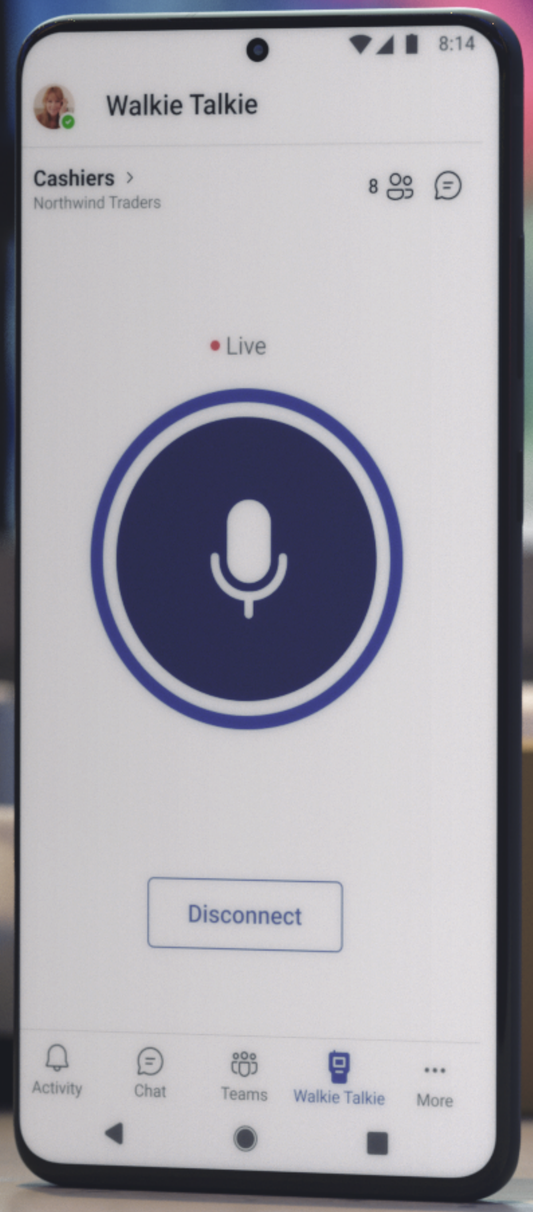

One solution for all communication

Save your pockets some space and some money.

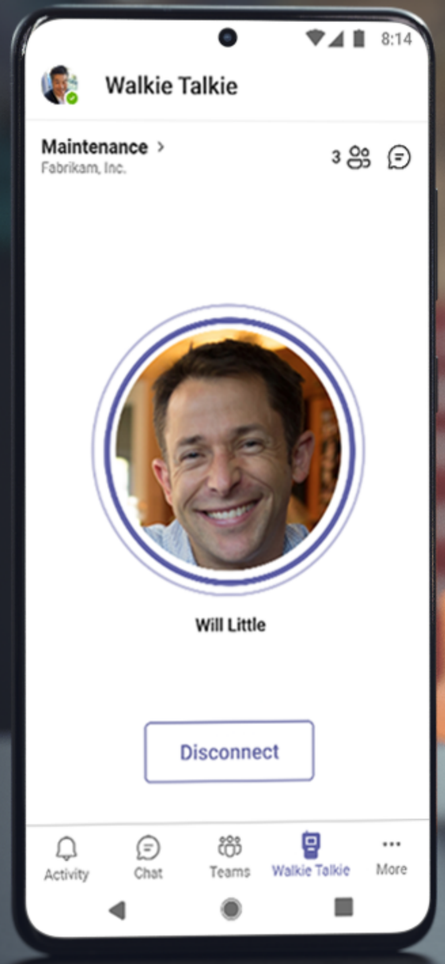

With Walkie Talkie, you no longer need to have a separate radio and a smartphone to communicate with your team.

Enjoy an instant push-to-talk experience that turns employee or company owned Android devices into a walkie–talkie.

Talk beyond traditional radio boundaries

Connect from anywhere. With internet or cellular service, distance restrictions disappear.

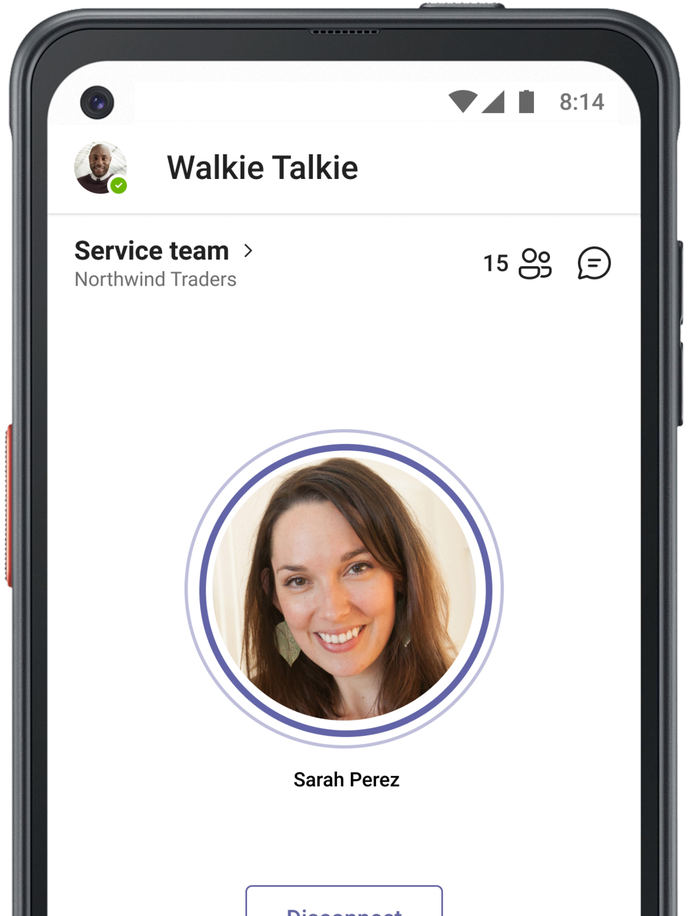

Secure, clear and instant

Say good-bye to static and crosstalk and hello to clear communication.

Securely connect with your team with no worry about interference from outsiders on the same radio frequency.

Hands free, Heads up with integrated push-to-talk headset or device

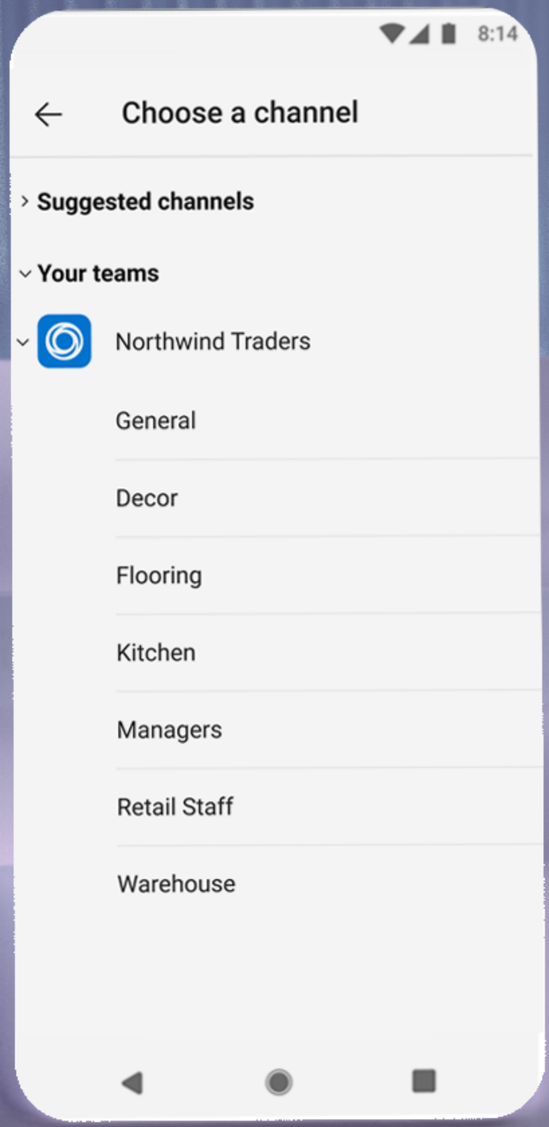

WHO'S CONNECTED

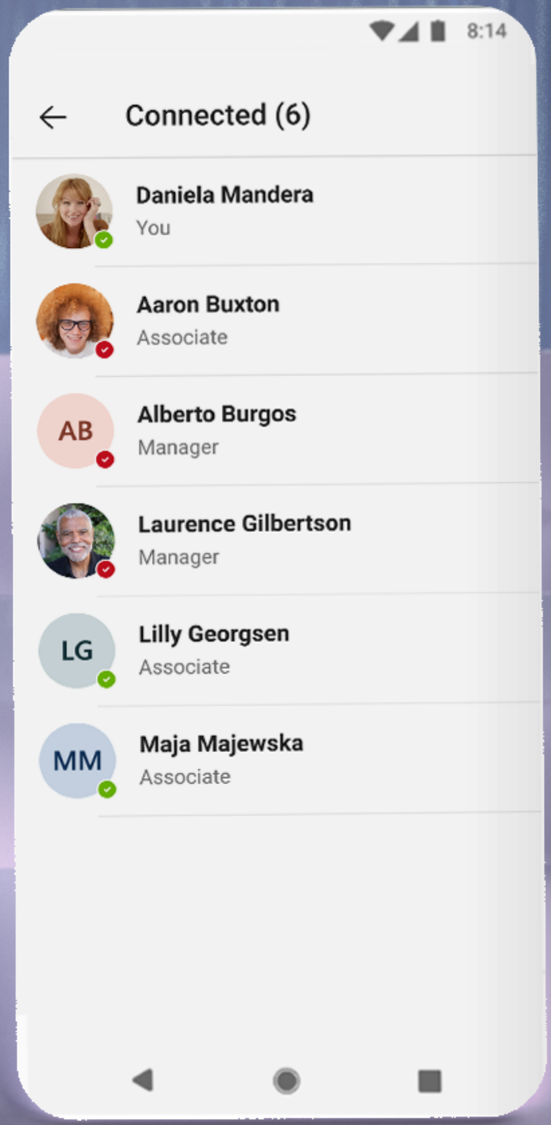

See who is in the channel with you and who is responding.

WHICH CHANNEL

Walkie Talkie channels are based on your already configured Teams channels, so you talk to the right people at the right time.

Channels are suggested based on current activity and what you have used previously.

HOW TO KEEP THE CONVERSATION GOING

Whether you need to send a picture or have a 1:1 conversation, quickly transition within the app from group push-to-talk communication to chats and calls for the right conversation.

WHERE

All in Walkie Talkie in Microsoft Teams, where we don't just talk the talk but walk the walk.
