## The art and science of prompting

**Prompts** are how you ask Microsoft 365 Copilot to do something for you — like creating, summarizing, editing, or transforming. Think about prompting like having a conversation, using plain but clear language and providing context like you would with an assistant.

### 1. Tell Copilot what you need

There are many types of prompts you can use depending on what task you want done.

- ✓ **Learn about projects and concepts:**  
"What is [Project X] and who are the key stakeholders working on it?"
- ✓ **Edit text:**  
"Check this product launch rationale for inconsistencies."
- ✓ **Transform documents:**  
"Transform this FAQ doc into a 10-slide onboarding guide."
- ✓ **Summarize information:**  
"Write a session abstract of this [presentation]."
- ✓ **Create engaging content:**  
"Create a value proposition for [Product X]."
- ✓ **Catch-up on missed items:**  
"Provide a summary of the updates and action items on [Project X]."

### 2. Include the right prompt ingredients

To get the best response, it's important to focus on some of the key elements below when phrasing your Copilot prompts.

#### Goal

What response do you want from Copilot?

#### Context

Why do you need it and who is involved?

Generate 3-5 bullet points to prepare me for a meeting with Client X to discuss their "Phase 3+" brand campaign. Focus on Email and Teams chats since June. Please use simple language so I can get up to speed quickly.
