

Keep business running with fast, reliable data recovery and low-cost storage

 The cost and scale of ransomware attacks, malicious incidents, and accidental deletions continues to increase.

Microsoft 365 Backup

Ensure business continuity with fast, reliable backup and recovery in hours—not weeks.

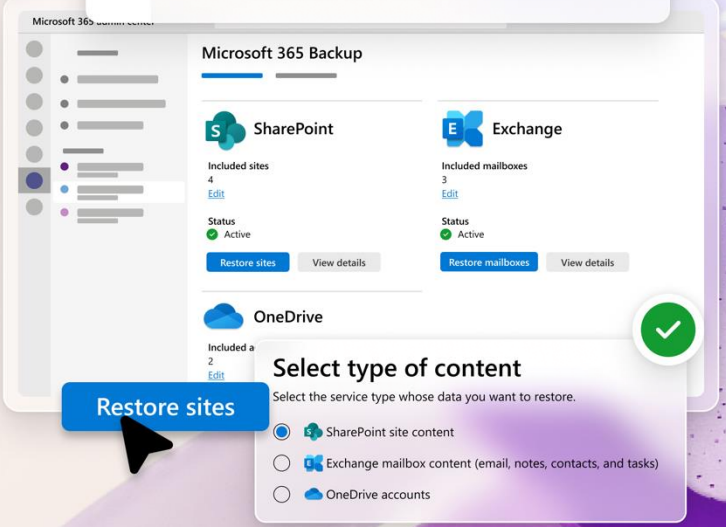

- Restore any amount of data
- Add resiliency against cyberattacks
- Simplify management for admins

For additional capabilities, look for a recognized partner solution built on **Microsoft 365 Backup Storage**

Gain the same business continuity assurance for data beyond SharePoint, OneDrive, and Exchange.

Microsoft 365 Backup Storage
Bulk restore recovery speeds of up to
2TB
per hour at scale¹

Keep business moving and optimize costs—no matter the age of your data

- 

Backup and restore
All active data up to 1 year
- 

Archive
Retain inactive data for many years

 Storing inactive data alongside active files can complicate workflows and drive up costs.

Microsoft 365 Archive

Leverage cost-effective storage for inactive SharePoint content

- Manage your growing SharePoint sites
- Archive at scale
- Reactivate at any time

 Find what you need fast—archived data is excluded from Microsoft 365 Copilot

- Improve the relevance of search results
- Reduce the risk of oversharing data

Reduce monthly storage costs²

Monthly cost for 200GB additional storage

Tenant quota

\$10
month

Using Archive Storage
\$0.05 / GB

\$40
month

Purchasing excess hot storage
\$0.20 / GB

Microsoft 365 Archive
Reduce the cost of storing inactive content by up to
75%³

 **Backed by Microsoft 365 security and compliance**
Maintain security and compliance by staying within the Microsoft 365 trust boundary.
