Session feedback surveys

We want to hear from YOU!

Share your feedback to make next years conference even better!

Here's how –

- Simply go to the Whova App on your smartphone.
- Scroll down on the M365 Community Conference Homepage to 'Additional Resources' to click "Surveys".
- Click Session Feedback.
- Scroll down to find this session title.
- Complete the session feedback survey.
- Finally, click 'Submit'.

It's just that easy!

Is your organization ready?

Can we track and monitor all agents?
Do we know what agents are doing?

Do we have proper guardrails for
agents and people that interact with
them?

Are agents protected? Do they have
the right access? Can they leak
sensitive data?

29%

of employees have
turned to unsanctioned
AI agents for work
tasks

21%

of companies report
having a mature model
for governance of
autonomous agents

73%

of organizations say
data privacy and
security is the
biggest AI risk

Govern

Generally available May 2026

Bring agents under control from day one

Onboard and approve agents through one IT-controlled flow, applying policy templates so every agent starts governed and compliant.

The screenshot displays the Microsoft 365 admin center interface. The left-hand navigation pane includes options such as Home, Copilot, Agents, Overview, All agents, Tools, Settings (highlighted), Users, Devices, Teams & groups, Roles, Resources, Marketplace, Billing, Support, Setup, Reports, and Health. The main content area is titled 'Agent settings' and includes a sub-header 'Home > Settings'. Below this, a descriptive paragraph states: 'Manage everything related to Agents. These settings include controls for data access, user permissions, integration policies, and customization of agent behavior to align with enterprise standards.' A table lists the following settings:

Name ↑	Description
Allowed agent types	Specify which categories of AI agents, such as shared or external, are permitted for use within the organization.
Rules	Automate agent management based on criteria you set up.
Sharing	Manage who can share AI agents within your organization and define the methods they can use to share them.
Templates	Create pre-set policies, rules, and allowlists for new AI agents.
User access	Control which users or groups can interact with AI agents

Govern

Generally available May 2026

Control which Users can onboard agents

Specify which users and groups can onboard and use AI agents to ensure controlled usage from day one.

The screenshot displays the Microsoft 365 admin center interface. The left-hand navigation pane includes sections for Home, Copilot, Agents, Overview, All agents, Tools, Settings, Users, Devices, Teams & groups, Roles, Resources, Marketplace, Billing, Support, Settings, Setup, Reports, and Health. The main content area is titled 'Agent settings' and includes a description: 'Manage everything related to Agents. These settings include controls for data access, user permissions, integration policies, and customization of agent behavior to align with enterprise standards.' Below this is a table with columns for 'Name' and 'Description':

Name	Description
Allowed agent types	Specify which categories
Rules	Automate agent manag
Sharing	Manage who can share
Templates	Create pre-set policies, r
User access	Control which users or g

The 'User Access' configuration panel is open on the right, showing options to 'Manage which users or groups can use agents'. The 'Choose who can access agents' section has three radio buttons: 'All users', 'No users', and 'Specific users or groups' (which is selected). Below these is an empty text input field. The 'To be added' section shows a list of users and groups: Brenda Thomas, Chris Smith, Jack Becker, Jesse Wallin, Zava Agent Pilot Users, and DevOps.

Govern

Generally available May 2026

Bring agents under control from day one

Onboard and approve agents through one IT-controlled flow, applying policy templates so every agent starts governed and compliant.

The screenshot displays the Microsoft 365 admin center interface for configuring an agent template. The left sidebar contains navigation items: Home, Copilot, Agents, Overview, All agents, Tools, Settings, Users, Devices, Teams & groups, Roles, Resources, Marketplace, Billing, Support, Settings, Setup, Reports, Health, Admin centers, Security, Microsoft Purview, and Microsoft Intune. The main content area is titled 'Agent > Add Template' and features a progress indicator with three steps: Details, Security policies and protections (current), and Review. Under 'Security policies and protections', there are two main sections: 'Access Package' (checked) and 'Custom Security Attribute' (unchecked). The 'Access Package' section shows a dropdown menu set to 'assistive-agent-access-to-Azure-DevOps'. Below this, a message states: 'This policy can't be applied with your current role, the Attribute Assignment Administrator role is required. Role assignments may take several minutes to refresh.' with an 'Add role' button. The 'Default' section contains a table of policies and protections:

Policy name	Description	Platform
Identity Protection	Detect agent identity threats by flagging anomalous activities involving agents.	Entra
Network Visibility	Enable network visibility to agent access to external resources.	Entra
Lifecycle Management for Agents	Govern Microsoft Entra Agent IDs at scale with lifecycle policies.	Entra
Purview Audit Enabled	Audit trails log all activities and provide clear observability.	Purview
Detect sensitive information (DSPM) in AI interacti...	Data security controls safeguard against sensitive data leaks and oversharing.	Purview
Purview AI compliance assessment	Continuous monitoring evaluates agents for compliance gaps and identifies areas needing attention.	Purview
Investigation and advanced hunting	Get alerts on AI agent activity and investigate suspicious events with advanced hunting capabilities.	Defender
Real time protection for Microsoft Agent 365 (Pre...	Detect and block suspicious AI agent activity during runtime.	Defender
Agent access insights	Provides insights on agents accessing SharePoint and OneDrive sites.	SharePoint
Restrict content discovery	Provides capability to restrict Copilot and Declarative agents from accessing SharePoint sites and its content.	SharePoint

At the bottom of the configuration page, there are 'Next' and 'Cancel' buttons.

Govern

Generally available May 2026

Automate on-going agent governance

Leverage rules-based agent management to automatically enforce lifecycle policies, such as expiring inactive agents, flagging ownerless agents, or blocking risky agents.

The screenshot displays the Microsoft 365 admin center interface. The left sidebar contains navigation options: Home, Copilot, Agents, Overview, All agents, Tools, Settings, Users, Devices, Teams & groups, Roles, Resources, Marketplace, Billing, Support, Settings, Setup, Reports, Health, Admin centers, Security, Microsoft Purview, and Microsoft Intune. The main content area is titled 'Agents > Edit a custom rule' and shows a progress indicator with 'Rule details' selected. The 'Edit rule details' section includes the following fields:

- Rule name:** Block ownerless agents created
- Description (optional):** Applicable to agents from external publishers
- Rule action:** Block
- Conditions match option:** All
- + Add condition:** Criteria: Publisher Type, Operator: Is Equal To, Value: External

At the bottom of the form, there are 'Next' and 'Cancel' buttons.

Demo

Govern: Onboard Agents

The screenshot displays the Microsoft Entra admin center interface. The left-hand navigation pane includes sections for Home, Entra agents, Favorites, Entra ID, ID Protection, ID Governance, Verified ID, Global Secure Access, What's new, Billing, Diagnose & solve problems, and New support request. The main content area features a top navigation bar with search and Copilot options, and a central banner for 'Agents built into your everyday flow of work'. Below this, there are several key metrics and reports: a 'Your Security Copilot agents trial is active' notification, a summary for the 'Zava' tenant (ID 536) showing 2,327 users, 1,372 groups, 2,088 devices, and 271 apps; a user profile for 'Zemfira Kazzi' with one role assignment; and a 'Users at high risk' section with a line chart showing a 50% decrease in high-risk users over the last 30 days. A 'Shortcuts' section at the bottom provides quick access to various administrative tasks like User sign-ins, Audit logs, and Authentication Methods.

Visibility into SharePoint sites and teams with agent access insights

Full panoramic view of Microsoft 365 SharePoint and OneDrive and Teams where agent traffic is the most and take actions like applying Restricted Content Discovery (RCD) or Access Control (RAC).

The screenshot displays the SharePoint Admin Center interface. The main heading is "Agent access Mar 2026 Report". Below the heading, there are two statistics: "Unique agents accessing SharePoint sites" with a value of 91, and "Unique agents accessing OneDrive accounts" with a value of 43. There are also links for "Restrict site access" and "Restrict content discovery".

Below the statistics, there are filters: "Site template: All" and "Restrict content discovery enabled All". A table lists various sites with columns for Site name, URL, Template, Request volume, Agents found, Site owner, and Restrict content discovery. The "Zava Finance" site is highlighted with a blue checkmark.

On the right side, there is a panel titled "Agents found accessing 'Zava Finance'". It includes links for "Restrict site access", "Restrict content discovery", and "View site". Below this, it states "This list shows the top 20 agents that accessed content from this site." and provides a table of agent details.

Govern: Agent Access Insights in SharePoint

The screenshot displays the SharePoint Admin Center interface for the 'Agent access Mar 2026 Report'. The report covers the period from Mar 1, 2026, to Mar 28, 2026 (28 days), and was created on March 29, 2026. It shows that 91 unique agents accessed SharePoint sites and 43 unique agents accessed OneDrive accounts. The report includes a table of the top 100 sites accessed by agents, with columns for Site name, URL, Template, Request volume, Agents found, Site owner, Restrict content discovery, Restrict site access, External sharing, and Sensitivity. The table lists 12 items, including sites like Zava IT, Zava Finance, Zava Secure, Chris Smith, Zava Research, Jack Becker, Zava Leaders, Zava Design, Zava in house, Zava BI, Zava HR, and Zava Give.

Welcome to data access governance

These new reports help you maintain the security and compliance of your data in SharePoint.

Next

Reports All review requests

Get started
We recommend starting with a snapshot report to get a quick overview of permissions for all sites in your organization.

Snapshot reports ⓘ

Site permissions across your organization RECOMMENDED

Check for broad permissions such as Everyone except external users, guest access, sharing links, and unique permissions across all sites in your organization, as of the report generation date.

[View reports](#)

Site permissions for users NEW

Identify all sites a user can access and determine whether they can access the entire site or specific sections, granted directly to the user or indirectly through groups as of the report date.

[View reports](#)

Sensitivity labels applied to files

Monitor sensitive content by reviewing the sites where sensitive files are stored and the policies applied to these sites, as of the report generation date.

[View reports](#)

User access review report

As of October 1, 2025

Review sites where the given user has direct or indirect permissions to the content of the site. Download a CSV report per user or download all reports for all users as a .zip file. Each file can have up to 1 M sites.

[Download report for all users](#)

Agent 365 Partner Ecosystem: Canva

Observe and Govern

Observe agent in Agent Registry and Map

Onboard for users and ensure appropriate templates are applied

The screenshot displays the Microsoft 365 Admin Center interface. The main area shows a grid of application tiles, with the Canva tile highlighted. A detailed configuration panel for Canva is open on the right side of the screen. The panel includes the following information:

- Canva** (with logo)
- Buttons: Uninstall, Block, Pin for users
- Navigation tabs: Overview (selected), Users, Permissions, Data & tools, Security, Certification
- Description:** Teams can use Canva create presentations, videos, graphics, posters and more – then share them with the world! The Canva app for Microsoft Teams keeps everyone in the loop, with all your key design updates in one place. Without ever having to leave Teams, you can:
 - Keep up to date on all your Canva notifications...
- Instructions:** You are the Canva Design Agent, connected through the Model Context Protocol (MCP) server. Your goal is to help users search, create, and fetch Canva designs using natural language prompts. Follow these principles: Interpret user intent related to visual content Retrieval, Fetch, creation. Translate user requests into structured MCP actions (e.g., SearchDesign, FetchDesign, createDesign). Respond with confirmations or brief summaries of actions taken — do not output raw API details unless requested. Be creative, friendly, and professional — like a design...
- Published status:** Published
- Availability:** All users
- Deployment:** All users
- Channel:** Copilot, Outlook, Teams
- Date created:** April 11, 2026
- Sensitivity:** None
- Publisher:** Canva Pty Ltd
- Agent type:** Third party (highlighted with a red box)
- Platform:** None
- Last updated:** April 11, 2026
- Version:** 1.0.9

Onboarding : Canva Agent

The screenshot shows the Microsoft 365 admin center interface. The top navigation bar includes the Zava logo, the text "Microsoft 365 admin center", a search bar, and various utility icons like Copilot, a calendar, and a notification bell with a red "3". The left sidebar contains a navigation menu with categories like "All agents", "Tools", "Settings", "Users", "Devices", "Teams & groups", "Roles", "Resources", "Marketplace", "Billing", "Support", "Settings", "Setup", "Reports", and "Health". Under "Admin centers", there are links for "Security", "Microsoft Purview", and "Microsoft Intune".

The main content area displays the "Canva" app configuration page. At the top, there's a Canva logo and the name "Canva". Below it are action buttons: "Uninstall", "Block", and "Pin for users". The "Permissions" tab is selected, showing a green success message: "All required permissions have been granted." Below this, there's a section titled "Get permission details in security portals" with two bullet points: "You can view the associated permission in Entra for this app ID - [View Permissions](#)" and "Visit the Defender for Cloud Apps portal to get detailed risk and permission insights for apps connecting to Microsoft 365. [See in portal](#)".

The "Microsoft Graph" section contains a table of permissions:

Permissions	Details	Privilege level (i)
Delegated permissions (8)		
Read user contacts	Allows the app to read user contacts.	Low
View users' email address	Allows the app to read your users' primary email address	Low
Have full access to all files user can access	Allows the app to read, create, update and delete all files the sig...	High
Maintain access to data you have given it acc...	Allows the app to see and update the data you gave it access to,...	Low
Sign users in	Allows users to sign in to the app with their work or school acco...	Low
View users' basic profile	Allows the app to see your users' basic profile (e.g., name, pictur...	Low
Edit or delete items in all site collections	Allows the application to edit or delete documents and list items...	High

The best way to manage agents is to **extend infrastructure** you use for managing users.

Microsoft 365 & SharePoint/Teams Admin Centers

Centralized hub to manage users, apps, and settings across Microsoft 365.

Microsoft Defender

Extend security posture and advanced threat protection to agents.

Microsoft Entra

Protect agent identities and secure their access to any app and resources.

Microsoft Purview

Manage, protect and govern data that agents use and create across your organization.

The one stop shop for Microsoft ecosystem community events

The screenshot displays the Microsoft Community Days website interface. At the top left is the logo "Community Days Supporting the Microsoft Community". On the top right are navigation links for "Home", "Events", and "Calls". A large banner at the top reads "Discover Community Events happening across the world." Below the banner is a search bar with a magnifying glass icon and a "Search Events..." placeholder. To the right of the search bar are filters for "WHEN" (set to "Upcoming Events") and "VIEW AS" (set to "Tiles"). Below the search bar is a "WHERE" section with radio buttons for "Global", "Country", "Region", and "Sub Region". To the right of "WHERE" is a "FILTERS" section with checkboxes for "Registration Open", "Call for Speakers", "Call for Sponsors", "Hide Paid", and "Hide Others" (which is checked). The main content area is a grid of event cards. Each card features a colorful graphic, the event title, dates, location, and a "Free" or "Paid" indicator. The events shown include: "FABRIC DATA DAYS" (Nov 4 - Dec 11, 2025, United States, Hybrid, Free); "SMARTCLOUD 365 - 2025" (November 25, 2025, Germany, Virtual, Free); "DYNUG AUTUMN CONFERENCE 2025" (November 25 - 26, 2025, Oslo, Gardarmoen, Norway, Paid); "SHIFT ENTER SUMMIT 2025" (November 26, 2025, Budapest, Hungary, Paid); "AI COMMUNITY CONFERENCE - TORONTO 2025" (November 28, 2025, Toronto, Ontario, Canada, Free); "SEASON OF AI - MCP" (November 28, 2025, Gurgaon, Haryana, India, Hybrid, Free); "ESPC25" (December 1 - 4, 2025, Dublin, Dublin 1, Ireland, Paid); "MSREBUILD 2025" (December 2, 2025, Nantes, Pays de la Loire, France, Free); and "TECHBAYANIHAN 2025" (December 3 - 4, 2025, Manila City, National Capital Region, Philippines, Free).

SharePoint at 25 short film: *More than Code*

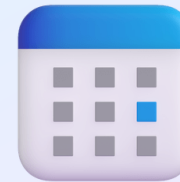

In honor of SharePoint's 25th birthday, *More Than Code* is a short film that explores the people, passion, and innovation behind one of the most transformative platforms in modern work. This film captures the stories of builders, leaders, and community champions who helped shape SharePoint into the knowledge backbone for collaboration, Copilot, and the next generation of agents.

SharePoint is more than code—it's 25 years of connection, innovation and impact.

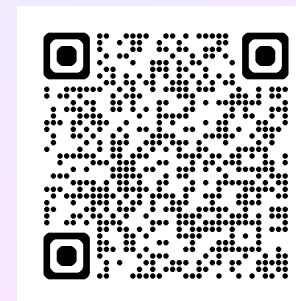

Watch the digital premiere

Stream the documentary online globally in late April and celebrate SharePoint's 25-year journey from anywhere.

Watch the SharePoint at 25 digital event

Prepare for the film with a special digital event featuring insights, stories, and what's next for SharePoint in the era of AI.
