

Microsoft 365  
COMMUNITY CONFERENCE

# Chat with your Power BI data

# Uhova

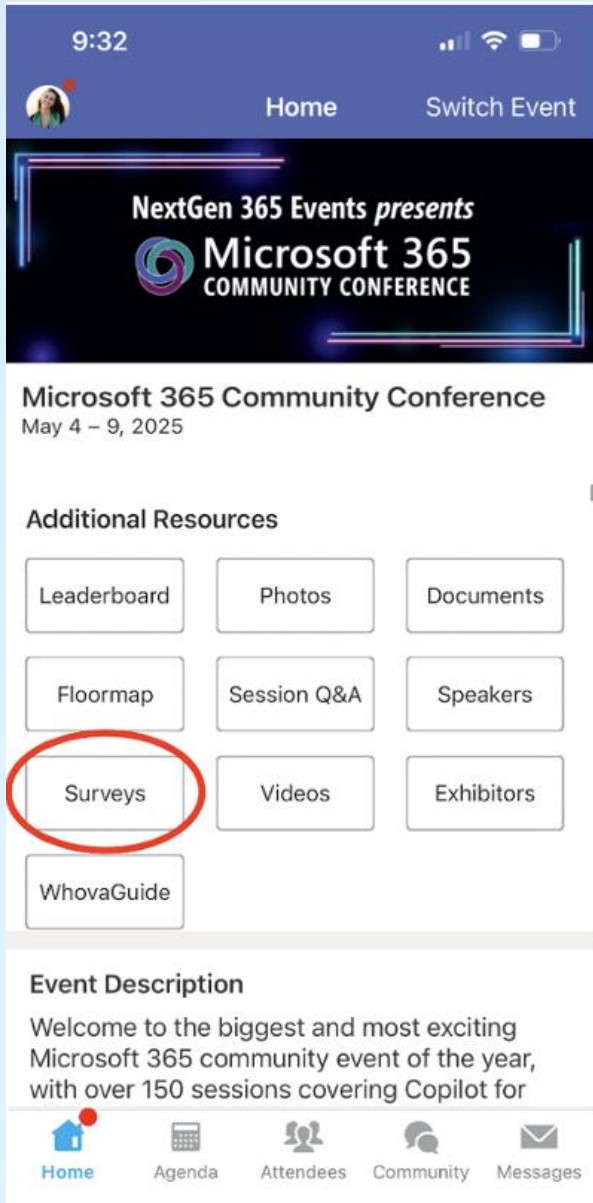

The official event app for the  
**Microsoft 365 Community Conference**

**Event invitation code: Orlando2026**

**Join the event app to access:**

- ➔ Event announcements
- ➔ Personalized agenda, session details
- ➔ Speaker & attendee profiles
- ➔ Networking, meet-ups, messages
- ➔ Event documents

# Session feedback surveys

We want to hear from YOU!

Share your feedback to make next years conference even better!

Here's how –

- Simply go to the Whova App on your smartphone.
- Scroll down on the M365 Community Conference Homepage to 'Additional Resources' to click "Surveys".
- Click Session Feedback.
- Scroll down to find this session title.
- Complete the session feedback survey.
- Finally, click 'Submit'.

It's just that easy!

@ Microsoft

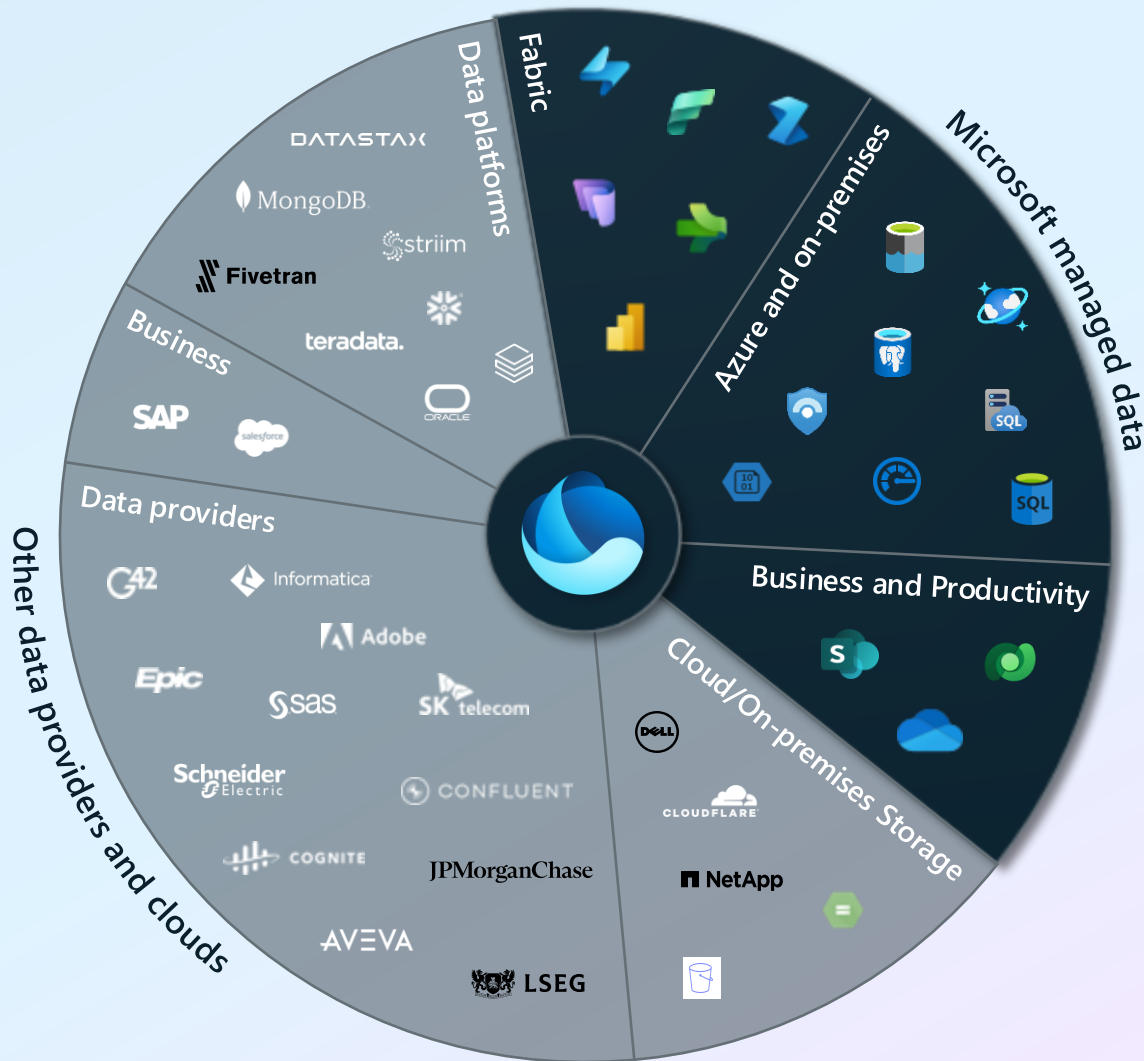

AI is changing the world

Data is the **fuel** that powers AI

# Unified Data Culture

# A mix of data questions from a sea of data

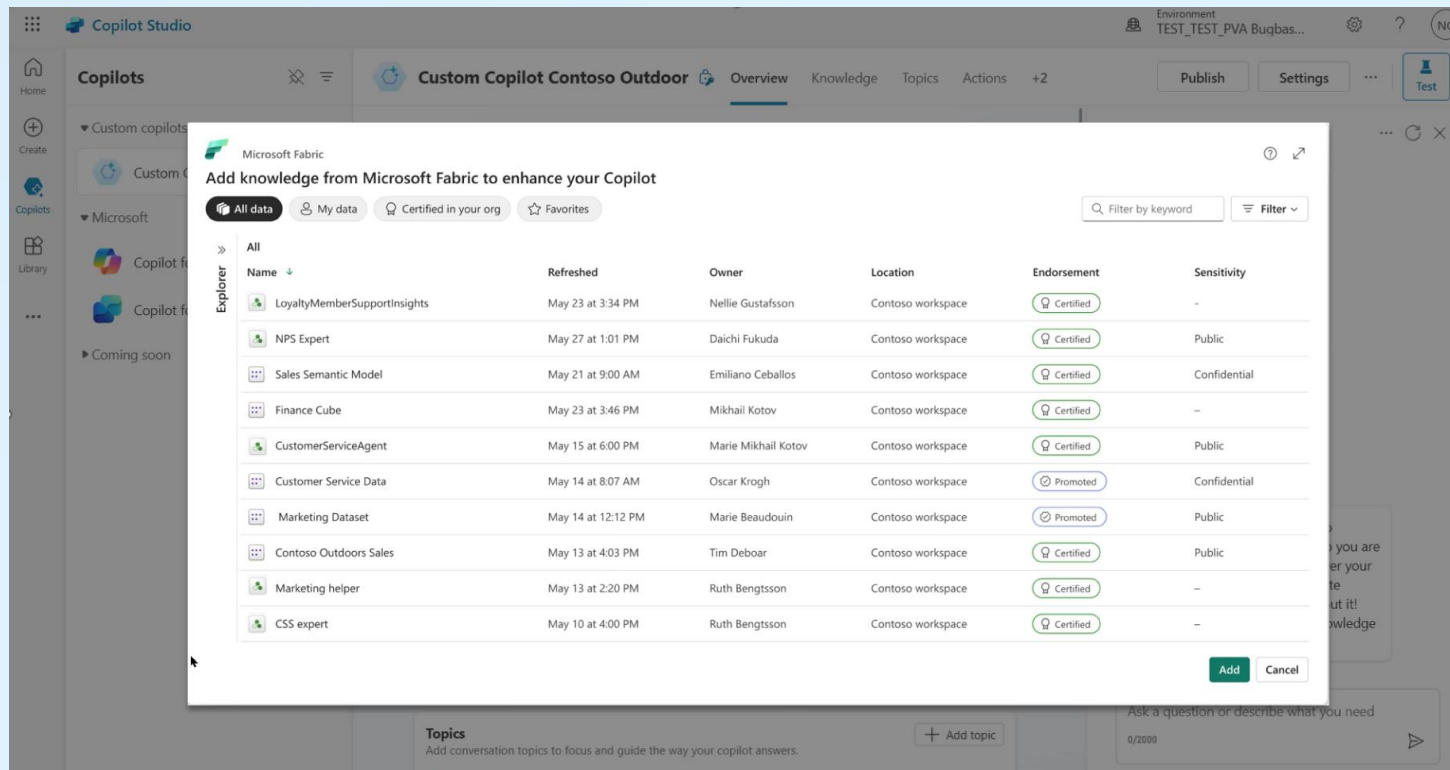

Multiple systems and databases, on multiple clouds

Different log-ins, APIs, and query languages

Different user access rights to the data

All needed to serve business users with no understanding of the data topology and no ability or audit for correctness

# Semantic models, Data agents and the M365 Copilot

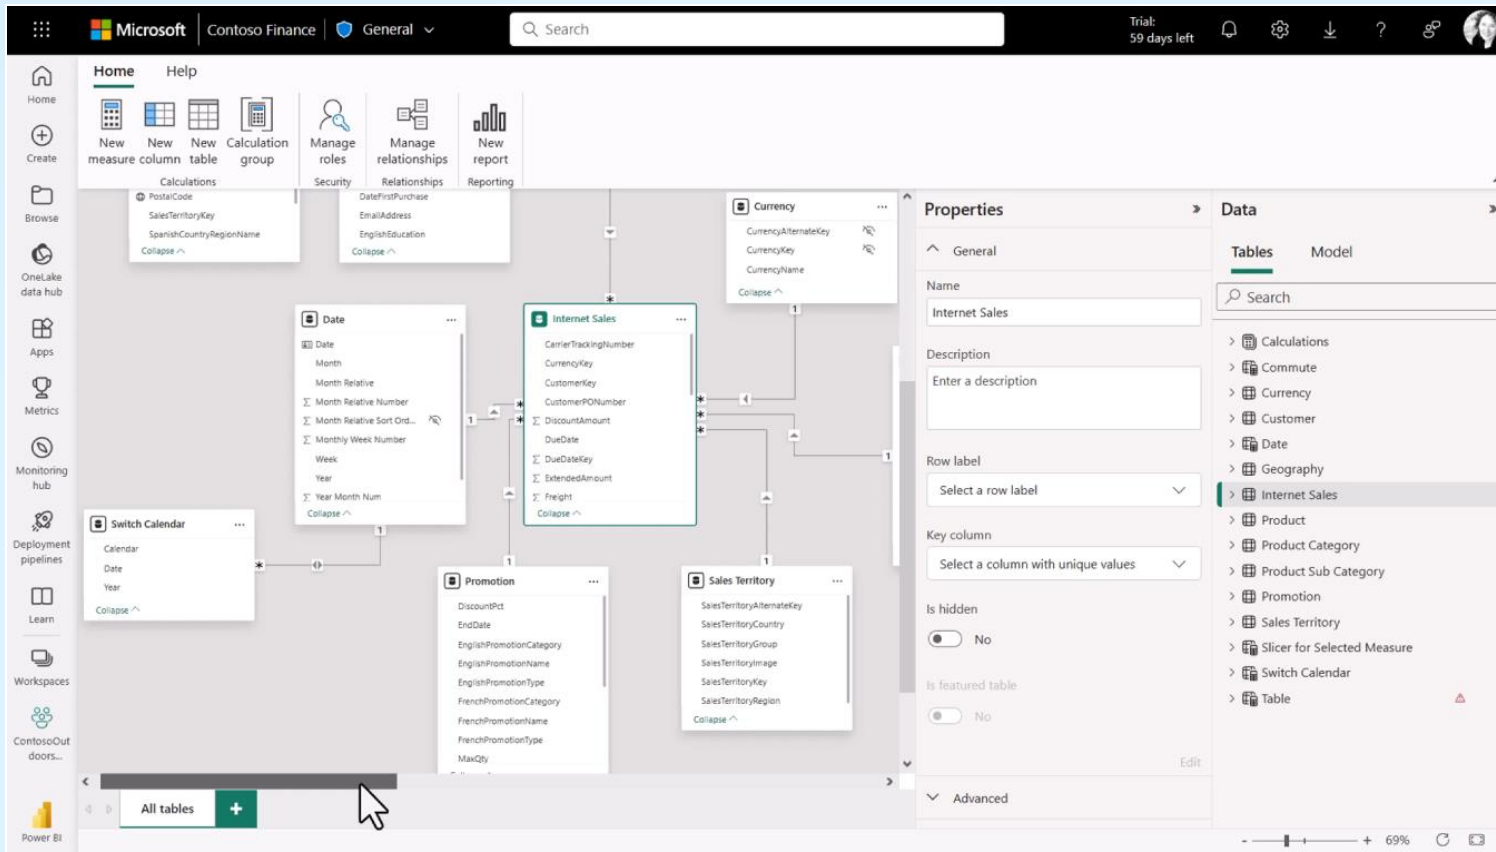

Semantic models automatically become Data Agents, each providing "Chat with your data" for specific data domain

Good grounding from their usage in reports + customizations can be added

NL Queries fully respect the security permissions of the user

Instantly integrated into M365 Copilot

# The Semantic models superpowers

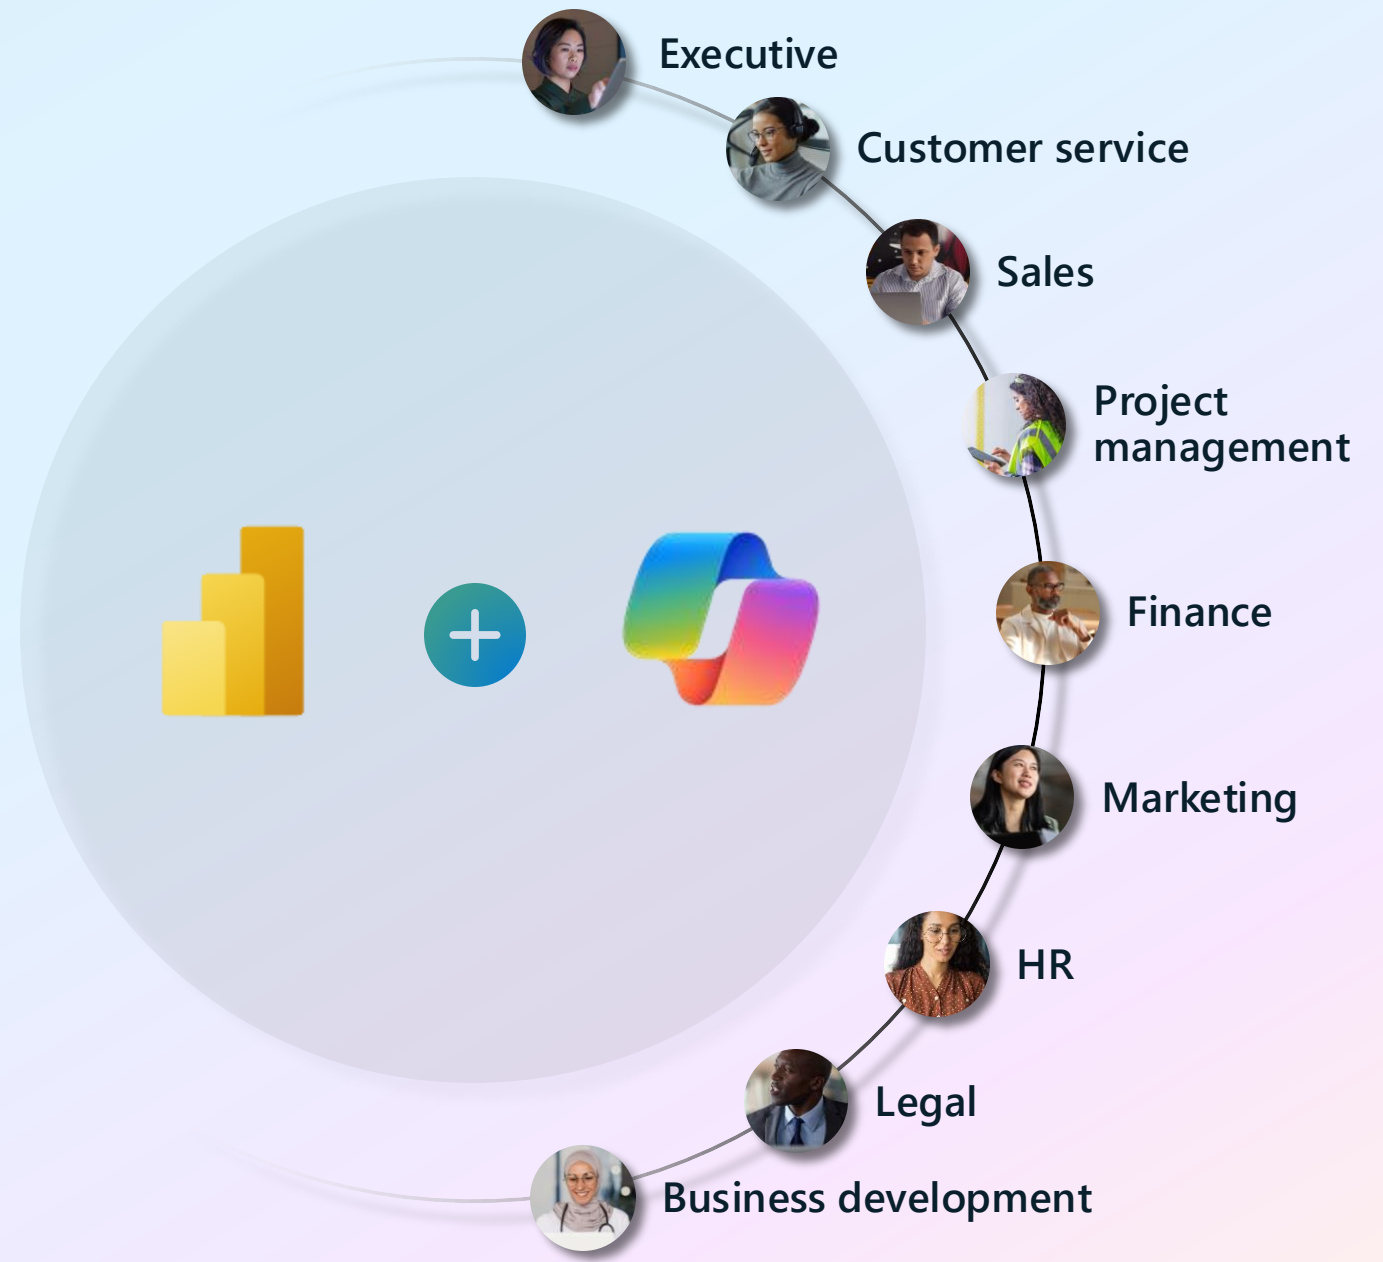

Semantic models define corporate metrics and KPI definitions, tables/columns with friendly names, and known relationships

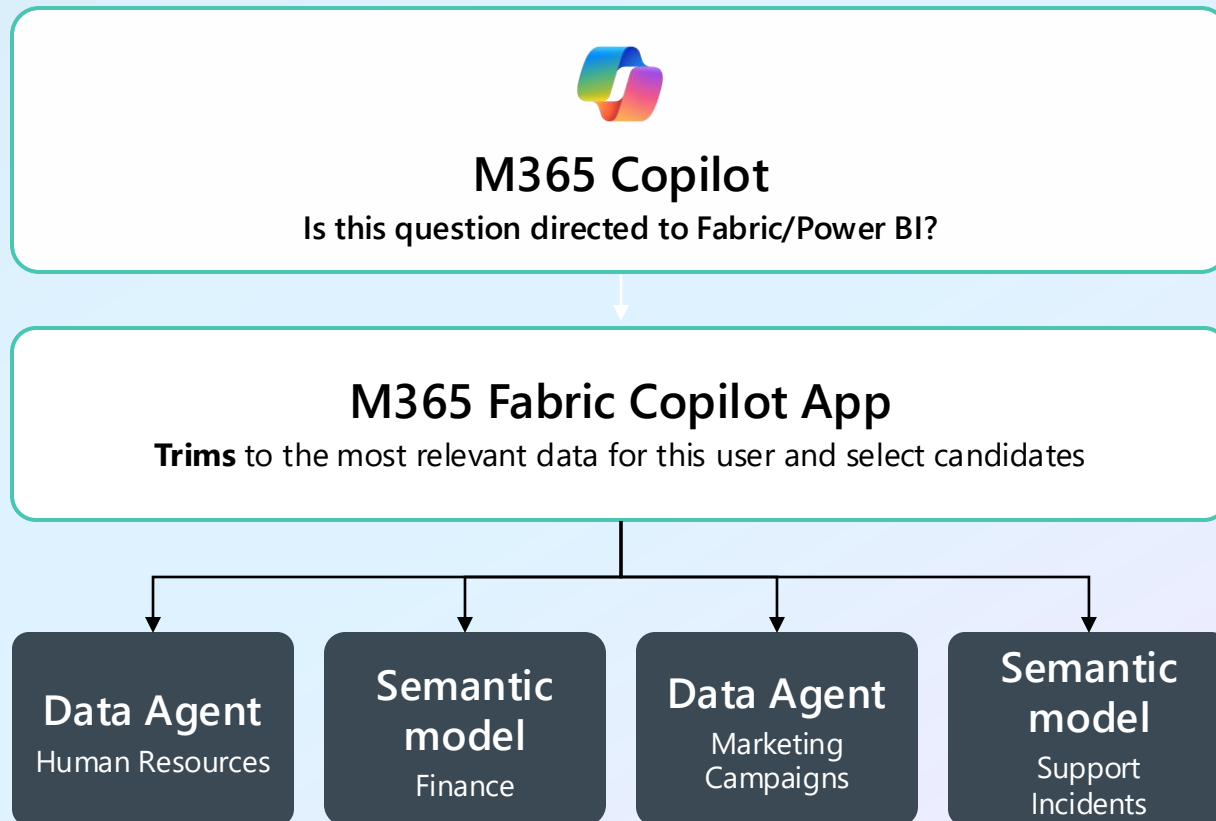

Trusted, vetted and certified as the basis for management reporting in Power BI and Excel

Assists in eliminating a large part of the guess work for AI

Streamlining  
how end users  
explore data

# “Chat with ALL your data” in M365 Copilot

Power BI's "Chat with your data" in M365 Copilot

Aggregates and routes questions to the most relevant data available to a user

Answering the NL queries fully respecting data security

# Copilot Experiences in Power BI

# Copilot in Power BI

## End-to-end scenario

For **developers**, the focus is on ensuring your semantic model is AI-ready by simplifying your schema, creating verified answers, and providing AI instructions.

For **business users**, the focus is on exploring and understanding data through natural language. You learn how to ask questions, interpret answers, dig deeper into insights, and summarize your findings.

# Which capabilities are affected by preparing my data for Copilot?

Capability	AI Data Schema	Verified Answers	AI Instructions	Descriptions
Get a summary of my report	✗	✗	✓	✗
Ask a question about the visuals on my report	✗	✓	✓	✗
Ask a question about my semantic model	✓	✓	✓	✗
Create a report page	✗	✗	✓	✗
Search	✗	✓	✗	✓
DAX query	✗	✗	✓	✓

Learn more: <https://learn.microsoft.com/en-us/power-bi/create-reports/copilot-prepare-data-ai-faq>

## Important: Evaluation of outputs

Copilot and many other LLM tools are non-deterministic. This means that two users submitting the same prompt that uses the same grounding data can obtain different results. This non-determinism is inherent to the underlying technology of generative AI and is an important consideration when you expect or need deterministic results.

Consider training users to write good prompts before you enable Copilot for them. Ensure that users understand the difference between a clear prompt that can produce useful results, and a vague prompt that doesn't.

# Standalone Copilot in Power BI experiences

## Find an item

Find the reports, semantic models, apps, and data agents that you have access to

## Get a summary

Provides summaries about an entire report or a specific topic within that report.

## Ask a question

Get answers to the questions in your data using the visuals and properties in your model

# Find content through metadata

## Find an item

Find the reports, semantic models, apps, and data agents that you have access to

Power BI Copilot search can find reports, semantic models, data agents, workspace apps, and organizational apps by looking at a breadth of metadata to find content.

To determine the most relevant items, Power BI Copilot search looks through metadata, such as the following:

- Title of an item
- Description of an item
- Name of the item's workspace
- Content within an item

**Learn more:** <https://learn.microsoft.com/power-bi/create-reports/copilot-search-new-content>

# Get a summary and discover insights

## Get a summary

Provides summaries about an entire report or a specific topic within that report.

Copilot takes the visuals that were curated and built by report authors and generates summaries, overviews, insights and answers grounded in the report data.

Determine your objectives and focus on the aspects of the data that are most relevant to your topic or key questions:

- Relevance
- Precision
- Flexibility
- Personalization

**Learn more:** <https://learn.microsoft.com/power-bi/create-reports/copilot-pane-summarize-content#get-started-in-the-standalone-power-bi-copilot-experience>

# Ask a question about your data

## Ask a question

Get answers to the questions in your data using the visuals and properties in your model

Tell Copilot what you're looking for, and if the answer isn't already visualized on your report or marked as a verified answer, Copilot will query your model and return the answer to your question.

**Learn more:** <https://learn.microsoft.com/en-us/power-bi/create-reports/copilot-chat-with-data-standalone#ask-questions-about-your-data>

**DEMO**

**We have an  
exciting future ahead.**

### Microsoft 365 Copilot

Deliver value and employee satisfaction with our tools for Microsoft 365 Copilot deployment and adoption. This powerful technology combines the power of large language models (LLMs) with your organization's data – all in the flow of work – to turn your words into one of the most powerful productivity tools on the planet.

Microsoft 365 Copilot Chat and in-app experiences provide real-time intelligent assistance, enabling users to enhance their creativity, productivity, and skills.

# The one stop shop for Microsoft ecosystem community events

The screenshot displays the Microsoft Community Days website interface. At the top left is the logo "Community Days Supporting the Microsoft Community". The main header features the text "Discover Community Events happening across the world." Below this is a search bar and filter options. The "WHERE" filter is set to "Global". The "WHEN" filter is set to "Upcoming Events". The "VIEW AS" filter is set to "Tiles". The "FILTERS" section includes checkboxes for "Registration Open", "Call for Speakers", "Call for Sponsors", "Hide Paid", and "Hide Others".

The main content area displays a grid of event tiles. Each tile includes a title, dates, location, and a "Free" or "Paid" indicator. The events shown are:

- FABRIC DATA DAYS**: Nov 4 - Dec 11, 2025. Location: Your city, Your country, United States. Format: Hybrid. Status: Free.
- SMARTCLOUD 365 - 2025**: November 25, 2025. Location: Germany. Format: Virtual. Status: Free.
- DYNUG AUTUMN CONFERENCE 2025**: November 25 - 26, 2025. Location: Oslo, Gardermoen, Norway. Status: Paid.
- SHIFT ENTER SUMMIT 2025**: November 26, 2025. Location: Budapest, Hungary. Status: Paid.
- AI COMMUNITY CONFERENCE - TORONTO 2025**: November 28, 2025. Location: Toronto, Ontario, Canada. Status: Free.
- SEASON OF AI - MCP**: November 28, 2025. Location: Gurgaon, Haryana, India. Format: Hybrid. Status: Free.
- ESPC25**: December 1 - 4, 2025. Location: Dublin, Dublin 1, Ireland. Status: Paid.
- MSREBUILD 2025**: December 2, 2025. Location: Nambois, Pays de la Loire, France. Status: Free.
- AI COMMUNITY CONFERENCE**: November 28, 2025. Location: Seoul, Jongno District, Seoul, Korea, Republic of. Status: Paid.
- TECHBAYANIHAN 2025**: December 3 - 4, 2025. Location: Manila City, National Capital Region, Philippines. Status: Free.

# SharePoint at 25 short film: *More than Code*

In honor of SharePoint's 25th birthday, *More Than Code* is a short film that explores the people, passion, and innovation behind one of the most transformative platforms in modern work. This film captures the stories of builders, leaders, and community champions who helped shape SharePoint into the knowledge backbone for collaboration, Copilot, and the next generation of agents.

SharePoint is more than code—it's 25 years of connection, innovation and impact.

## Watch the digital premiere

Stream the documentary online globally in late April and celebrate SharePoint's 25-year journey from anywhere.

## Watch the SharePoint at 25 digital event

Prepare for the film with a special digital event featuring insights, stories, and what's next for SharePoint in the era of AI.
