

Microsoft Teams Phone for Executives

Executives are busy people who need streamlined tools that enables them to stay focused on what is important, whilst working in harmony with their executive assistants and extended teams.

With Microsoft Teams Phone, communication and collaboration are brought together for a simpler, more connected experience.

Technology defines the employee experience. I can't say enough about what our teams accomplish through the connected collaboration they enjoy with Microsoft solutions.

J. Trinidad (Trini) Garibay,
Chief Executive Officer and Cofounder, Elite Construction + Development

Seamless teamwork with delegated access.

Select up to 25 delegates who can manage calls on your behalf so you can focus on what is important.

Minimize distractions and prioritize communications.

With priority access and do not disturb, you can take control over your day and never miss on important communication.

Easily transfer calls from your desktop to your mobile and inversely with end point transfer.

Work how you want to work with a range of devices to choose from to suit your needs and working style without compromising on your user experience.

Collaborate with your team on new or existing documents whether on a chat, meeting or a call, without having to leave Teams.
